

COMPLEX COMPUTING PROBLEMS

(COURSE PROJECT)

INTRODUCTION TO INFORMATION & COMMUNICATION TECHNOLOGIES

INSTRUCTOR	Muhammad Tauqeer
COURSE CODE	GER-111/SEN111
SEMESTER	1 st
CREDIT HOURS	1 (Lab)
KNOWLEDGE DOMAIN	General Education

The semester project is designed to enable students to tackle complex computing problems. The following characteristics of complex computing problems are targeted in this semester's project of Introduction to Information of Communication Technologies:

WP 1	Depth of Knowledge Required
WP 2	Range of Conflicting Requirements
WP 3	Depth of Analysis Required

PROJECT TITLE: Design and Development of a Personal or Professional Portfolio Website

Project Description

Students will create a professional portfolio website that highlights their personal or professional accomplishments, showcasing skills, projects, and other achievements in a well-organized and visually appealing format.

Project Development Process:

1. Project Progress Report:

- Students will provide regular updates on their progress, including:
 - Integration of design and content elements.
 - Challenges faced, such as layout or compatibility issues.
- Feedback will be provided to guide improvements.

2. Website Development and Implementation:

- Students will develop the website using fundamental web development technologies like:
 - **HTML** for structure.
 - **CSS** for design and responsiveness.
 - **JavaScript** for interactivity (optional).
- Projects will be evaluated based on:
 - Effective integration of content (WP1).
 - Responsiveness and functionality (WP2).
 - Creativity and coherence of design (WP3).

Key Project Requirements:

- **Content Sections:** Must include About Me, Skills, Projects, and Contact Information.
- **Responsive Design:** The website should adapt to different screen sizes.
- **Aesthetic Design:** Use colors, fonts, and layout creatively to enhance visual appeal.

3. Final Submission:

- A comprehensive project report must include:
 - Website goals and purpose.
 - Screenshots of the final website.
 - Description of tools and techniques used.
 - Challenges faced and solutions implemented.
- Students must present their websites through a live demo and explain their design choices using PowerPoint.

Assessment Criteria:

- **Progress Reports:** 20%
 - **Design and Development:** 40%
 - **Final Presentation and Report:** 40%
-
